## FACTSHEET

## GENERAL DESCRIPTION

We as NFC21 dedicate ourselves to the technology of NFC in its fullest. This fairly "new" technology has already been introduced more than 10 years ago and is just now starting to get more attention in everyday life. Still, its use needs explanation and consultation. We are very appreciative for every request: technical, conceptual or informative and happy to answer them all. We do not understand ourselves as a pure online seller of NFC products and software developers, but as pioneers of NFC technology - we are here to support everyone in making NFC come alive in everyday life.

The main motivation of NFC21 is to point out the potential of NFC with qualified products and intelligent solutions. Respectively, we pursue a holistic approach, containing the development, the production as well as the offering of products and software solutions based on NFC technology.

Our service includes:

- **NFC21 Tag-Shop:** The most complete and richful sortiment of NFC-products in e-commerce
- **NFC21 Cloud:** Intelligent digitization for NFC-based inventory with additional maintenance and testing processes
- **NFC21 Smart:** products that use NFC to simplify everyday life
- **NFC21 Fairways:** interactive and paperless exhibition solutions for a unique visitor experience
- **NFC21 Tools:** at the beginning of each NFC project there is the programming of the NFC tag. Our software solutions make this process easy and uncomplicated
- **NFC21 Solutions:** with NFC21-Solutions we support your ideas based on NFC. Profit from our experience and create your desired solution together with us

Our customer is broad-ranging: companies using NFC and NFC21-Solutions for a more efficient organization, advertisers the same as private customers for simplifying their day. Thus, we present all NFC-interested customers a platform for information and direct purchase of NFC products.

Our online shop contains a comprehensive assortment of 300+ NFC products with high availability and fast delivery. The range of products is complemented by customization and personal consultation for a perfectly fit product.
